

Demonstration of Proposed Features

Date: 29 September 2026	Team ID: SWTID-2026-9692
Project Name: WeatherWise (ai-weatherwise-api)	Maximum Marks: 1 Mark

Demonstration of Proposed Features

This document captures all the features that were proposed during the project planning phase and tracks whether each feature was successfully implemented and demonstrated [cite: 27]. It serves as evidence of the team's ability to deliver on the proposed solution [cite: 27].

S.No	Feature Name	Description	Status	Demonstrated	Remarks
1	User Registration API	POST endpoint (/api/auth/register) to onboard new users with secure password hashing and JWT token generation.	Implemented	Yes	Tested via Thunder Client with HTTP 201 Created response.
2	User Login & Authentication	POST endpoint (/api/auth/login) for authenticating users and returning a JWT token for secure requests.	Implemented	Yes	Verified with HTTP 200 OK and JSON bearer payload.
3	City Weather Fetching	GET endpoint (/api/weather/chennai) retrieving live weather data including temperature, humidity, and condition.	Implemented	Yes	Returns live parameters (e.g. 32.8°C, 63% humidity).
4	AI Weather Summary Generator	POST endpoint (/api/ai/weather-summary) generating human-readable natural language weather summaries via Gemini API.	Implemented	Yes	Generates concise weather condition summaries.
5	AI Personalized Recommendations	POST endpoint (/api/ai/weather-recommendation) providing tailored advice (clothing, hydration) based on local conditions.	Implemented	Yes	Outputs actionable lifestyle tips based on current weather.

Feature Implementation Summary

Total Features Proposed: 5	Total Features Demonstrated: 5
Total Features Implemented: 5	Overall Implementation Rate (%): 100%
