

User Acceptance Testing (UAT) Report

Date: September 28, 2026	Team ID: SWTID-2026-9692
Project Name: AI WeatherWise API	Version: 1.0.0

1. Project Overview

- **Project Name:** ai-weatherwise-api
- **Description:** Node.js/Express backend service providing user authentication, weather data retrieval, and AI-powered weather summaries and recommendations using MongoDB and Gemini API.
- **Testing Period:** September 28, 2026
- **Testing Scope:** /api/auth/register, /api/auth/login, /api/weather/chennai, /api/ai/weather-summary, /api/ai/weather-recommendation
- **Environment:** URL: http://localhost:5001 | Database: MongoDB (127.0.0.1)
- **Credentials:** shree@gmail.com / 1234567

2. Test Cases Result

ID	Scenario	Test Steps	Expected Result	Actual Result	Status
TC-001	User Registration	1. POST to /api/auth/register 2. Payload: {"name": "shree", "email": "shree@gmail.com", "password": "1234567"}	HTTP 201 Created with user details and JWT token.	Status 201 Created; returned user ID 6ab6013... and JWT token.	PASS
TC-002	User Login	1. POST to /api/auth/login 2. Payload: {"email": "shree@gmail.com", "password": "1234567"}	HTTP 200 OK with authenticated user profile and JWT token.	Status 200 OK (134 ms); returned user data and JWT token.	PASS
TC-003	Fetch Weather Data	1. GET to /api/weather/chennai	HTTP 200 OK returning weather attributes for Chennai.	Status 200 OK (1.81 s); returned weather object (Temp: 32.8°C, Clouds).	PASS
TC-004	AI Weather Summary	1. POST to /api/ai/weather-summary 2. Payload with city weather data.	HTTP 200 OK returning AI-generated weather summary text.	Status 200 OK (2.30 s); returned text response. (API model deprecation logged)	PASS
TC-005	AI Weather Recommendation	1. POST to /api/ai/weather-recommendation 2. Payload with temp & condition.	HTTP 200 OK returning tailored activity/clothing tips.	Status 200 OK (986 ms); returned clothing recommendations.	PASS

3. Bug Tracking

Bug ID	Description	Steps to Reproduce	Severity	Status	Additional Feedback
BG-001	Deprecated Gemini API model endpoint error in server terminal logs.	1. Run npm run dev 2. Call AI weather endpoints. 3. Check server console.	Medium	Open	Terminal logs 404 for gemini-2.5-flash. Update model string to gemini-3.8-flash in server code.

4. Sign-off

Tester Name: Shree	Date: September 28, 2026	Signature: Shree
--------------------	--------------------------	------------------

5. Document Notes & Best Practices

- Ensure all test cases cover both positive and negative scenarios.
- Encourage testers to provide detailed feedback, including suggestions for improvement.
- Bug tracking must include details such as severity, status, and clear reproduction steps.
- Obtain sign-off from both the project manager and product owner prior to production deployment.
