

Project Demo Planning

SmartBridge Skill Wallet • Demonstration Plan & Execution Strategy

Date: 29 September 2026	Team ID: SWTID-2026-9692
Project Name: WeatherWise (ai-weatherwise-api)	Maximum Marks: 1 Mark

Project Demo Planning

A well-structured demo plan ensures that the team presents the project effectively, covering all key aspects in a clear and organized manner [cite: 35]. This document outlines the plan for demonstrating the project, including the flow of the demo, key features to highlight, and responsibilities of each team member [cite: 35].

S.No	Demo Section	Description	Duration (mins)	Responsible Member
1	Project Overview & Auth Setup	Introduce WeatherWise architecture, backend stack (Express/MongoDB), and demonstrate User Registration & Login endpoints.	2	Team Member 1
2	Real-time Weather Data API	Demonstrate live weather data fetching endpoint (/api/weather/chennai) showing real-time metrics (temperature, humidity, wind).	2	Team Member 2
3	AI Weather Summary Engine	Showcase natural language weather summary generation using Gemini API via /api/ai/weather-summary.	3	Team Member 3
4	AI Personalized Recommendations	Demonstrate automated lifestyle, hydration, and clothing recommendations via /api/ai/weather-recommendation.	3	Team Member 4
5	Error Handling & Edge Cases	Explain fallback mechanics and error handling strategy when external services or AI model endpoints are unavailable.	2	Team Lead

Demo Flow Summary

Step	Activity	Notes
1	Introduction & Problem Statement	Briefly state the goal of WeatherWise: combining real-time weather monitoring with intelligent AI insights.
2	Solution Overview	Present system architecture, REST API design, MongoDB integration, and Gemini AI integration.
3	Live Feature Demonstration	Execute Thunder Client requests for Auth, Weather API, AI Summary, and AI Recommendations in live sequence.
4	Q&A Session	Address evaluator questions regarding API performance, security tokens, and deployment strategy.
