

PROJECT DESIGN PHASE: PROPOSED SOLUTION TEMPLATE

Date: 15 February 2025	Team ID: SWTID-2026-9692
Project Name: AI WeatherWise API	Maximum Marks: 2 Marks

S.No	Parameter	Description
1	Problem Statement	Standard weather applications show raw numbers (e.g., temperature, humidity %) without actionable guidance on daily attire or personal health/comfort precautions.
2	Idea / Solution Description	An AI-powered REST API (ai-weatherwise-api) featuring secure JWT authentication, real-time weather retrieval, and Google Gemini AI integration for contextual weather summaries and clothing recommendations.
3	Novelty / Uniqueness	Directly combines live weather parameters with LLM prompt engineering to return tailored, human-readable daily advice (e.g., light cotton clothing and hydration tips).
4	Social Impact / Customer Satisfaction	Saves planning time during morning routines and optimizes daily comfort and preparedness for outdoor activities.
5	Business Model	Freemium API model providing free tiers for developers and metered enterprise tiers for smart home / wearable integrations.
6	Scalability of Solution	Built on lightweight Express.js microservice architecture with MongoDB, enabling fast horizontally scalable containerized deployment.
